**Generate** more swim school revenue

A UNIQUE

# SWIM SCHOOL

PRODUCT

## ABOUT THE PLATFORM

**SPLASH DECK** creates a solid swim teaching standing platform in the water. The platform is designed to assist in the delivery of swimming lessons in deeper water or shallow water where students are unable to touch the bottom of the pool and it has been created especially with swim schools, leisure companies, pool operators and schools in mind.

**SPLASH DECK** aims to provide swim schools with a safe learning environment for their students. A confident and happy student who feels safe will progress faster and Swimming Instructors can fully utilise the space that is available to them within their lessons, and their use can be commercially effective too.

The use of one or multiple **SPLASH DECK** platforms within a swim school program can significantly increase the capacity of a swim school by efficient use of the space available.

## QUALITY ASSURANCE

**SPLASH DECK** has been independently tested to assess for weight loading and build quality by a leading testing and certification body under The General Product Safety Directive 2001/95/EC.

Every platform can withstand a massive 600kg load weight and are designed to allow for 3 - 4 (standard) or 5 - 6 children (large) in mind.

Each platform will be delivered fully assembled and ready for you to use.

## YOUR BRAND IDENTITY

If you prefer, we can easily identify the name of your company on your platform.

We use high quality textile printing on the platform mesh so that your logo is clearly noticeable both in and out of the swimming pool.

Being able to increase programme capacity has allowed some of our swim schools to eliminate waiting lists through use of platforms providing an instant return on our investment.
